Safety Information

- Read these Safety instructions carefully.
- Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
- Do not expose your Panel PC to rain or moisture, in order to prevent shock and fire hazard.
- Keep PDX-057T away from humidity.
- Do not open the cabinet to avoid electrical shock. Refer to your nearest dealer for qualified personnel servicing.
- Never touch un-insulated terminals or wire unless your power adaptor is disconnected.
- Locate your Panel PC as close as possible to the socket outline for easy access and to avoid force caused by entangling of your arms with surrounding cables from the Panel PC.
- USB connectors are not supplied with Limited Power Sources.
- If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.

DO NOT ATTEMPT TO OPEN OR TO DISASSEMBLE THE CHASSIS (ENCASING) OF THIS PRODUCT. PLEASE CONTACT YOUR DEALER FOR SERVICING FROM QUALIFIED TECHNICIAN.

Chapter 1

General Information

1.1 Product Description

PDX-057T is an ultra compact platform for the present demanding embedded and productive applications. It has new Vortex86DX SoC CPU which consumes only minimum power requirement when running at 1GHz, and DDR2 memory provides faster data transfer rate. By using 5.7" TFT LCD, PDX-057T becomes the perfect choice for a limited budget. In additional, the integrated 10/100M Ethernet port supplies the communication capability which makes PDX-057T can be more widely used when running with DOS, Linux, Windows CE, and Windows XP environment to become the perfect solution for system integration.

- 5.7" VGA TFT LCD
- 4-Wire Resistive Touch Panel
- DM&P Vortex86DX SoC 1GHz
- 256/512MB DDR2 system memory
- AMI BIOS
- 2 watchdog timer
- Compact Flash Type I/II / Micro SD
- 10/100Mbps Ethernet
- 2 USB 2.0 (host)

- 1 RS-232/485/422 ports
- Mini-PCI Socket (Wi-Fi Optional)
- Audio Out
- Single voltage +5V DC(5A Version)
- Multi voltage +8~+35V DC(8A Version)
- Fanless Design
- Operating temperature range of -20°C to +60°

1.2 Product Specification

CPU Board Specifications			
CPU	DM&P Vortex86DX 1GHz		
Cooks	L1:16KB I-Cache, 16KB D-Cache		
Cache	L2: 128KB Cache		
BIOS	AMI BIOS		
Memory	256/512MB DDR2 onboard		
Watchdog Timer	Software programmable from 30.5u to 512 seconds x 2 sets		
LAN	Integrated 10/100M Ethernet		
Audio	CM119 Line-Out		
Internal Drives	Compact Flash Type I/II slot		
internal Drives	Micro SD slot		
	RS-232/422/485 x 1		
I/O	USB ports (Ver2.0) x 2		
	RJ-45 Port x 1		
Expansion Slot	Mini-PCI socket x 1 (Internal)		
Mechanical & Environment			
Power Requirement	Single Voltage +5VDC (5A)		
1 ower Requirement	Multi Voltage +8~+35VDC (8A)		
Power Consumption	1.3A@5VDC		
Operating Temperature	-20 ~ +60 °C (-4 ~ +140 °F)		
Storage Temperature	-30 ~ +70 °C (-22 ~ +158 °F)		
Dimensions	152 x 112 x 33mm (5.98 x 4.41 x 1.3 inches)		
Weight	374g		
Certification	CE, FCC, VCCI, Vibration		

LCD Specifications	
Display Type	5.7" TFT LCD
Backlight Unit	LED
Display Resolution	640(W) x 480(H)
Brightness (cd/m²)	500 nits
Contrast Ratio	300:1
Display Color	262,144
Dot Pitch (mm)	0.06 x 0.18
Viewing Angle	Vertical 100°,
Viewing Angle	Horizontal 140°
Backlight Lifetime	25,000 hrs
Touchscreen	
Туре	Analog Resistive
Resolution	Continuous
Transmittance	80%
Controller	USB interface
Software Driver	Linux/WinCE/WinXP
Durability	1 million

2.7 Watchdog Timer

There are two watchdog timers in PDX-057T, we also provide DOS, Linux and WinCE example for your reference. For more technical support, please visit: http://www.dmp.com.tw/tech/vortex86dx/

Chapter 3

Driver Installation

VGA

The Vortex86DX processor also use external Display chip ""Volari™ Z9s" which is an ultra low powered graphics chipset with total power consumption at around 1-1.5 W.

LAN

The Vortex86DX processor also integrated 10/100Mbps Ethernet controller that supports both 10/100BASE-T and allows direct connection to your 10/100Mbps Ethernet based Local Area Network for full interaction with local servers, wide area networks such as the Internet. I/O and IRQ settings can be done by software with the supplied utility software, or it can be set for Plug and Play compatibility. The controller supports: Half / Full-Duplex Ethernet function to double channel bandwidth, auto media detection.

AUDIO

CM119 is a highly integrated single chip USB audio controller specifically for VoIP (Voice over internet protocol) application. All essential analog modules are embedded in CM119, including dual DAC and earphone driver, ADC, microphone booster, PLL, regulator, and USB transceiver. 8 GPIO pins can constitute a 24 key matrix directly support keypad control function without MCU.

Many features are programmable with jumper pins or external EEPROM. Vender can customize unique USB VID/PID to EEPROM for VoIP software authentication. Moreover, individual unique phone number for each device is possible via serial number stored in external EEPROM.

Operating system support

The PDX-057T provides the VGA and LAN drivers for Linux, Windows CE 5.0, CE 6.0, Windows XP Professional, and Windows Embedded standard (XPE). (Linux can use with Compact Flash card only.)

Please get the drivers from DMP official website: http://www.dmp.com.tw/tech/vortex86dx/.

PDX-057T also supports most of the popular Linux distributions, for more detail information, please visit DMP official website: http://www.dmp.com.tw/tech/vortex86dx/.

3.1. PDX-057T Development Note

<Primary /Secondary IDE: Master or Slave>

Micro SD: Primary Master

CF Slot: Secondary IDE: Master or Slave (User can use slide switch (in side of CF slot) to adjust Master or Slave

<Window CE6.0 development guide>

Windows Embedded CE 6.0 BSP, trial CE image and development notes, please visit Vortex86DX CPU website to get more information: http://www.dmp.com.tw/tech/vortex86dx/

<Linux installation note>

Please forced the IDE setting in BIOS to PIO mode before install Linux on PDX-057T as follows:

- 1-Go to the advanced BIOS setting and make the "Onboard IDE Operate Mode" is "Legacy Mode"
- 2-Go to the PCI/PnP and make the "PCI IDE BusMaster" is "Disable"
- < XP professional /Home /Embedded and Windows 2000 installation note >
- 1-Please visit Vortex86DX CPU website to get more information: http://www.dmp.com.tw/tech/vortex86dx/
- 2-Go to the Advanced and make "Onboard IDE operate Mode" "Native mode"
- 3-If your CF Card support UDMA2/4, please Go to the PCI PnP and make the "PCI IDE BusMaster" is "Enable"

<Enhance CF to run the UDMA2/4>

- 1-Make sure the CF Card is supporting UDMA 2/4 Mode or not.
- 2-Go to the PCI/PnP and make the "PCI IDE BusMaster" is "Enable"

<How to boot up from the Micro SD card>

- 1-Get into the BIOS setup Utility
- 2-Go to the Advanced
- 3-Choose Primary IDE Pin Select: SD card
- 4-Press "F10" to save configuration changes and exit setup

<Backlight On/Off through GPIO control>

Sample Code:

```
#include "stdafx.h"
unsigned char inportb(short addr)
{
  unsigned char cValue;
  _asm
    mov dx, addr
    in ax, dx
    mov cValue, al
  }
  return cValue;
}
void outpourtb(int addr, unsigned char val)
{
  __asm
  {
    push edx
    mov edx, DWORD PTR addr
    mov al, BYTE PTR val
    out dx, al
    pop edx
  }
}
```

```
void BackLightON()
{
  // Set register 4AH bit1 to 0 to enable GPIOB
  outportb(0x3d4, 0x4a);
  unsigned c = inport(0x3d5) & 0xfd;
  outportb(0x3d4, 0x4a);
  outportb(0x3d5, c);
  // Set register 48H bit1
  outportb(0x3d4, 0x48);
  c = inport(0x3d5) \mid 0x02;
  outportb(0x3d4, 0x48);
  outportb(0x3d5, c);
}
void BackLightOFF()
{
  // Set register 4AH bit1 to 0 to enable GPIOB
  outportb(0x3d4, 0x4a);
  unsigned c = inport(0x3d5) & 0xfd;
  outportb(0x3d4, 0x4a);
  outportb(0x3d5, c);
  // Clear register 48H bit1
  outportb(0x3d4, 0x48);
  c = inport(0x3d5) \& 0xfd;
  outportb(0x3d4, 0x48);
  outportb(0x3d5, c);
}
```

Note:

- 1-Wi-Fi module is optional: http://www.icop.com.tw/pddetail.aspx?id=67&pid=4
- 2 -PDX-057T COM1: support RS232/422/485, please contact your regional sales.
- 3 -PDX-057T series (CPU Speed: 1GHZ): Support Linux, Windows CE 5.0, CE 6.0, Windows XP Professional, and Windows Embedded standard (XPE). (Linux can use with Compact Flash card only.)

3.2. BIOS Default setting

If the system cannot be booted after BIOS changes are made, Please follow below procedures in order to restore the CMOS as default setting.

■ Press "End" Key, when the power on

- Press < Del> to enter the AMI BIOS setup
- Press "F9" to Load Optimized Defaults
- Press "F10" to Save configuration changes and exit setup

Warranty

This product is warranted to be in good working order for a period of one year from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it at no additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster. Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, originality to use this product. Vendor will not be liable for any claim made by any other related party. Return authorization must be obtained from the vendor before returned merchandise will be accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description.
